

PETROSUN: Performance Results on Social Obligations for 8M 2023

Almaty

19 September 2023

The support and implementation of state programs is one of the priorities in PETROSUN activities. Diesel fuel supplies at reduced prices are aimed at supporting the country's agricultural producers, as well as maintaining social stability.

Thus, to carry out the autumn field campaign, the company has planned to supply preferential diesel fuel in the amount of 260,000 tons, which is 61% of the total volume of fuel delivered to Kazakhstan's farmers.

It is worth reminding that in spring PETROSUN allocated 300,000 tons of preferential diesel fuel for sowing works – 72% of the total volume.

Upon the results of 8M 2023, with the total volume of diesel fuel produced by the refineries for PETROSUN at 1.6 million tons, the company received requests for 4.8 million tons, which is by almost 300% more.

Considering the critical need for diesel fuel during the period of severe shortage in 2023, PETROSUN, at the instruction of the First Deputy Prime Minister, has imported on its own almost 30,000 tons of diesel fuel produced by Russian refineries. The entire volume has been directed to meet the needs of Kazakhstan's fuel filling stations.

PETROSUN in a timely manner and in full volume implements all state programs to provide diesel fuel at preferential prices. Reports on the implementation of social programs are sent to the competent authority on a daily basis.

For reference: PETROSUN LLP, founded in January 2012, is a subsidiary of JSC National Company "KazMunayGas" and CNPC International in Kazakhstan LLP. As part of social responsibility, PETROSUN ensures preferential diesel fuel supply without participation in distribution to consumers. In order to control the product movement, by Order of the Ministry of Energy of the Republic of Kazakhstan a separate PIN code for preferential fuel was introduced at the local refineries in April 2023.

The uniform terms for petroleum products sale prescribed by the norms of the Entrepreneurial Code of the Republic of Kazakhstan are publicly available on the official website of PETROSUN (<https://petrosun.kz/>).
